

TECHNIGUARD
LIMITED

Robust Portable CCTV Towers

Protection where it's needed most...

Built to deal with today's harshest environments and toughest criminals the Techniguard MK II was designed with one thing in mind... Your Protection!

Designed with Security in mind the MK II was built to survive vandalism and deliberate attempts to destroy it whilst maintaining the ability to be deployed at a moments notice providing instant CCTV coverage to your site without the need for external power or connection of any kind.

Durability tested by the toughest weather Great Britain could throw at it the MK II will stand up to heavy winds, rain and even snow.

Deployed in minutes By Our Trained Installers

Monitored 24/7/365 By Dedicated Arc Stations

Techniguard Supported Police Rapid Response

Techniguard is the leading manufacturer and supplier of robust portable CCTV tower systems designed to reduce the need for static Security Officers on site.

The Techniguard system is deployed in minutes and maintains a continuous 360 degree camera coverage day and night so no incident or event will ever be missed. Intruder detection enables the system to be armed and disarmed both during working hours and none working hours as required.

Specifications

- Robust Portable tower unit 6m height.
- 360 Degree Camera Detection to 30m.
- Detection Firewalls 30m. (This can be increased if Required).
